

Idaho Cedar Sales

Hand Split Cedar Pickets

WHY BUY FROM US?

Idaho Cedar Sales is dedicated to making sure you get the best return on your split rail investment. We concentrate on manufacturing the nicest product available, do it at a sensible price, ship your order on time, and guarantee every stick you buy. We do this and more so that both you and your customers are *delighted* with the performance of our fencing.

Genuine red cedar beauty and durability.

When you sell Idaho Cedar Sales' split rail, your customers get the surpassing natural beauty of genuine red cedar. They also get durability without chemical preservatives since red cedar has its own resins, tannins and oils that make it highly resistant to rot, insects, decay fungus and weather.

Real split rail. Unlike other so-called split rail products which are sawn to "look" split, our product is *actually* split. Skillful use of modern hydraulic splitting equipment ensures consistent sizing, while preserving the natural split texture that makes this fence so attractive.

Easy to install and care for. Red cedar split rail is one the simplest fences to build, and requires no painting, staining or any other maintenance.

Quality workmanship. Our split rail is carefully manufactured and tightly graded for size, strength and appearance. Each piece that makes the grade is branded with our initials so you know you're getting Idaho Cedar Sales' quality. Further, we back every post and rail with our money-back guarantee of complete satisfaction.

Environmentally responsible. Idaho Cedar Sales' red cedar split rail fencing is an all-natural, biodegradable product, made from America's renewable and growing resource - wood.
