

GATE•STOP

'Soft & Quiet' GATE•STOP

**AVAILABLE
IN BLACK or
WHITE**

WHEN YOUR GATE NEEDS A SOFT TOUCH

Announcing the new soft-closing 'GATE•STOP' from D&D Technologies, the ideal gate alignment device for preventing hinge damage and prolonging gate life. There are three models to fit gates of different sizes, weights and materials.

This convenient designed device is molded from high-strength (glass fiber reinforced) polymer materials to be guaranteed against rust, distortion and staining. An integrated rubber buffer protects against "gate slam" and helps reduce noise significantly. The benefits are increased hinge and gate life and a less frequent need for gate adjustment or re-alignment.

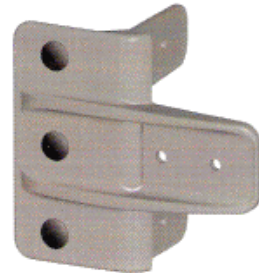

For gates higher than 4 feet (1.2m), two GATE•STOPS may be required to guard against 'concussion' or twisting damage.

METAL GATES TCGS3

WOODEN GATES TCGS2

PVC/VINYL GATES TCGS1

Features

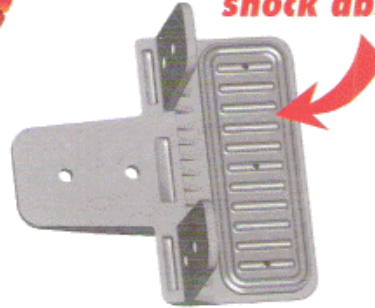

- Three models (sizes)
- Molded, reinforced polymer construction
- Stylish, modern design
- Rubber buffer insert
- ISO 9001 Accredited Manufacturer

Benefits

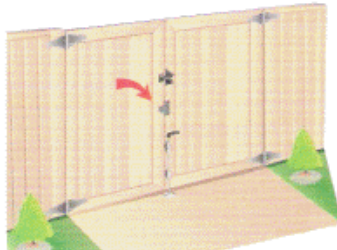

- Fits all gate sizes & materials.
- NO rust or staining! Tough, durable.
- Subtle, integrated appearance
- Soft, quiet closure. Prevents damage.
- Lifetime warranty

**Soft, quiet-action
shock absorber**
